Remarks

- Before turn on the flashlight, make sure the flashlight body, head and tail cap connect well.
- Do not disassemble any part of the flashlight
- The flashlight will become hot after long time use, which is normal.
- If the flashlight touched corrosive substances or liquid, should dry the finish right away.
- Do not put light directly to human eyes, we are irresponsible to the consequence
- Do not put the battery into fire (high temperature) or hit with force, which would make it explode, and it is out of our responsibility.
- During shipping or carrying, make sure the flashlight is turned off.

Simple exception handles

- The flashlight doesn't turn on: The tail cap is loose, please use tool to make it tightly connected to flashlight body.
- The flashlight can only be turn on from time to time: there is dirt on the threads, please use alcohol and cotton sticks to clean it.
- Short runtime: The battery capacity (quality) is low, please change the battery.
- For other faulty, please contact us or our distributors.

Warranty

All products from our company will have after sale service and warranty. Flashlight body will have one year's warranty. The followings are out of warranty:

- I. Human destruction, disassemble or modify the flashlight
- II. Fault operation caused damage
- III. If need to fix or change parts of the flashlight, we will charge the basic cost.
